June 23, 2014

Emera Maine recently determined that, for an indeterminate period of time, certain five-minute integrated energy data had been posted at regular intervals to a secure file transfer protocol (FTP) site to which one of its marketing affiliates had access. Such posted data reflected (i) the output of generators interconnected with Emera Maine – Maine Public District transmission lines and (ii) the load data of one transmission customer under the Emera Maine – Maine Public District Open Access Transmission Tariff. After discovering such postings, the affiliate's access was terminated. In addition, Emera Maine notified the entities whose data was included in the posting, as well as the Northern Maine Independent System Administrator.
